

Shovin Hospitals

Name: Patient Name

Age: 25

Gender: Male

Patient Report:

Summary: The patient has been experiencing constant tiredness, regular headaches, dizziness, and occasional stomach discomfort for a few weeks.

Symptoms: Fatigue, headaches, dizziness, stomach discomfort

Possible Disease: The symptoms could be indicative of various underlying health issues such as stress, migraines, anemia, or digestive problems.

Prescription:

- Adequate rest and hydration
- Over-the-counter pain relief medication (e.g. paracetamol) for headaches
- Antacids or digestive aids for stomach discomfort

Dosage Instructions:

- Paracetamol (Brand: Crocin): Take 500mg every 4-6 hours as needed for headaches
- Antacid (Brand: Gelusil): Take 1-2 tablets after meals for stomach discomfort

Precautions:

- Maintain a healthy diet
- Practice stress management techniques
- Follow up with any additional symptoms or if the current symptoms worsen

Please consult with a healthcare professional for a proper diagnosis and treatment plan. redness, headaches, dizziness, stomach pain
