Patient Information

Name: pravesh

Age: 45

Gender: male

Date: May 03, 2025

Medical Report

Summary:

The patient has been experiencing symptoms of cough and cold for about a week. No other symptoms like fever or body aches are present. The doctor will prescribe medication to help with the symptoms.

Symptoms:

Mild cough, cold

Possible Disease:

Common cold

Prescription:

- Rest and drink plenty of fluids - Over-the-counter medications (cough syrup, decongestants) - Consider nasal saline drops for nasal congestion

Dosage Instructions:

- Cough syrup (Brand: Robitussin): Take 10ml every 4-6 hours as needed for cough - Decongestant (Brand: Sudafed): Take 1 tablet every 4-6 hours as needed

for nasal congestion - Nasal saline drops: Use as directed for nasal congestion

Precautions:

- Get plenty of rest - Stay hydrated - Avoid exposure to cold weather - Follow up if symptoms worsen or persist in the next few days

Please consult with a healthcare professional before starting any new medications.
